EXPERIENCE

Freelancing Product and Visual Designer

Jan 2026 - present

- Freelance product and graphic designer partnering with clients
- to craft thoughtful digital products and visual identities that feel Modern, clear, and on-brand. I turn ideas into polished, user-friendly design solutions that support business goals while keeping creativity And collaboration at the center of every project.

TATA AutoComp System Ltd

Pune, India | Jan 2023 - Aug 2023

- Led design exploration for ambient lighting integration in Tata's next-generation EV lineup researching how light color, placement, and behavior could enhance perceived cabin quality, communicate vehicle status
- Contributed to the conceptualization of Smart Door Settings a feature aimed at personalizing the in-cabin experience through door-integrated controls and adaptive settings tailored to driver/passenger preferences.
- Collaborated cross-functionally with engineering and product planning teams to translate technical constraints and market research into feasible design directions
- Conducted target market and user preference analysis, studying emerging trends in EV interiors (both domestic and global) to inform design decisions that would resonate with Tata's customer base.
- Gained hands-on exposure to the automotive design process from early ideation and trend research through cross-team collaboration and visual storytelling, within a large-scale manufacturing environment.

TASK ROBOTS

Jaipur, India | February 2022 - August 2022

- Task Robots, being a E-Commerce company provides many such as Mobile App Development, Website Development, and cross-functional teams.
- Assisted across multiple design projects, creating mock-ups, editing images, and supporting the design team in delivering visual assets aligned with client and project requirements.
- Conducted ongoing research into online design and social media trends to keep visual output current, relevant, and competitive within the E-commerce and digital marketing space.
- Designed engaging social media post templates, applying thoughtful consideration of colour theory, typography, and visual composition to Create cohesive, brand-aligned content.
- Developed a working understanding of visual hierarchy and layout principles, balancing aesthetic appeal with clarity of message across different post formats and platforms.
- Managed and curated content strategies informed by user research, tailoring visual and written content to audience preferences and engagement patterns.

EDUCATION

ITLH UI UX Course

Design course
